North Brunswick, NJ
Portfolio: <https://josecalderon.dev/>

Computer Science student with hands-on experience building full-stack web applications, with a strong focus on backend engineering using Node.js, Flask, MySQL, and PostgreSQL. Skilled in designing RESTful APIs, managing databases, and implementing scalable, secure server-side logic, with a growing interest in system design. Passionate about building efficient systems that power reliable, user-focused applications.

EDUCATION

Kean University, Union, NJ Present - May 2027
B.S. in Computer Science
GPA: 3.89
Awards: Dean's List (Fall 2024, Spring 2025)
Relevant Coursework: Data Structures, Python Programming, 3-tier Database Management

CodePath Present – June 2026
Certificate in Advanced Web Development

Coding Dojo November 2023 – May 2024
Certificate in Full Stack Development

PROJECTS

iKicks - Online Sneaker Store | <https://github.com/Rafa2908/iKicks.git> November 2024 - May 2025
React, Node.js, Express, MongoDB, Stripe, JWT

- Developed a full-stack e-commerce application with secure JWT-based user authentication and Stripe-integrated payment processing.
- Built core features including a dynamic shopping cart with real-time updates, product search and filtering, and RESTful APIs for managing users, products, and orders.
- Designed an admin dashboard enabling full CRUD operations for efficient sneaker inventory management.

Nova - Social Media App | <https://github.com/Rafa2908/Nova.git> September 2025 - Present
React, Flask, MySQL, REST APIs

- Developed a responsive user interface using reusable React components to ensure a consistent and intuitive user experience.
- Implemented full CRUD functionality for user-generated content with real-time state management and seamless integration of backend REST APIs.
- Ensured secure data handling with MySQL through input validation, error handling, and clear user feedback for form submissions and API interactions.

SKILLS

Languages: JavaScript, Python, Java, PHP

Frontend: React, HTML, CSS, Bootstrap

Backend: Node.js, Express.js, Flask

Databases: MongoDB, MySQL, PostgreSQL, Supabase

Tools: Git, Linux, REST APIs, JWT
